

MOST POPULAR SPOT on the Albany-Montreal motor highway—a life-saving station, the first chance, known as "The Hungry Traveler," just over the international line, where the thirsty traveler may have his thirst "legally" quenched.

R. J. Kelly

OUR NEW POLICE DEPUTY, Dr. Carlton Simon, a famous criminologist and medical expert, with a wide knowledge of drugs and drug fiends, appointed by Commissioner Enright in an effort to rid the city of the 30,000 registered addicts.

Rich refinement is expressed in every line of this beautiful bloused wrap—a very special value in Genuine Alaska Seal. \$38.00

Do you use much milk for cooking?
KRYSTALAK saves 6¢ a quart

HEALTH demands that you use milk every day. You cannot reduce the quantity, therefore cook with Krystalak instead of fluid milk and save 6c on every quart.

Krystalak is pure, fresh, skimmed milk from which all the water has been removed. The foremost physicians, dietitians and food authorities of the U. S. Government recommend it for cooking.

Buy Krystalak at your grocer's packed in a clean, moisture-proof, blue and white striped package. Simply adding water makes it milk again—no lumping—no need for an egg beater. It dissolves instantly. Buy it to-day.

Each pound package makes five quarts. A clear saving to you of at least thirty cents. If your grocer has no Krystalak write for a trial package, enclosing your grocer's name and 10c in stamps or coin to cover mailing.

On sale at all leading grocers.

Geyser Electric Washer

The Small Washer with a Big Capacity

Almost as small
as a Kitchen Chair

Washes your clothes
in a "Geyser of Suds"

Two points of difference - and advantage

THE Geyser Electric Washer possesses two distinct advantages—smallness and washing principle.

The family size machine occupies floor space of about 24 inches square, yet it easily holds as large a wash as machines occupying greater space. This is possible because the unique Geyser washing principle utilizes the entire tank and cylinder space instead of only about one-third of it.

When you turn on the switch a powerful propeller beneath the clothes cylinder creates a "geyser" of hot, sudsy water which goes through and through the clothes and, at the same time, causes the cylinder to revolve, tumbling the clothes over and over and adding greatly to the thoroughness of cleaning. When you place your clothes of dainty materials in a Geyser Washer there is nothing to harm them.

All metal construction, with electrically welded frame. All water-exposed parts specially plated—rusting impossible. The washer

tank is made of galvanized Armco Iron or Copper. Simplicity of design—less than half the number of moving parts other washers have—and this means economical operation and no need of repairs. Absolute safety. No chains or belts in entire construction. Few gears—and all of them entirely enclosed. The motor is perfectly insulated from the washer.

You will appreciate the small, convenient size of the Geyser, its easy operation, its large capacity, its adjustable swinging wringer, and the method of washing, exclusive with the Geyser. The enamel finish is very attractive and durable.

The next time you are near any of the following stores, drop in and ask for a Geyser demonstration. You will see for yourself that this is the most compact and efficient clothes washer on the market. For further information about this wonderful washer, call Pennsylvania 6712 or 6124 and ask for Dept. M. Free Booklet upon request. Also easy term payment proposition.

Baby Size \$90—Laundry Size \$170
Standard Family Size \$150
